

ACTIVITY TERMS OF REFERENCE - COSME

a) ACTIVITY DETAILS

Activity Name: Purchase of boats to support select seaweed groups to ease access to the ocean and transportation of seaweed.

b) ACTIVITY INTRODUCTION

One of the main challenges that seaweed groups face in seaweed farming is transportation. Lack of appropriate means to cross deep waters and access farms across continues to pull some groups like Mtimbwani, whose production has steadily risen over the years as a result of investments by the project and other stakeholders. Whereas they are employing the best management practices in their farming, their harvest is prone to losses due to transportation and drying challenges. This therefore seeks to address the challenge of transportation within the groups. Chiromo and Jimbo are the other groups that face transport problems and have high number of farmers in seaweed. Chiromo's will also support Amka Utsamba, Nuru Islamic and Daima as they are all within the same vicinity.

The activity aims to procure three boats to support Mtimbwani, Chiromo and Jimbo.

The following are the boat details with amendments highlighted in yellow:

Item	Specification	Quantity per boat
Seaweed transportation Vessel	9-layer fibre-glass boat (28 ft long, by 6.5 ft width, by 2.5 ft depth fibre boat) with Polyvinyl gunwale, Antifouling Hull, Non slip deck, with 6 fenders. The boat will be transporting both people and seaweed materials. It should therefore have benches to allow for both farmers and seaweed transportation	1
Boat Engine	Boat Engine (2 stroke E40MHL - tiller handle - 15 HP) The preferred engine is 15hp. Yamaha E15XMHL	1
Safety equipment	High grade Life jacket (level 100)	15
	Fire extinguisher (CO2) 2kg	1
	Life rings	2
	Generic FIRST AID KIT RED ZIP AROUND FABRIC POUCH 8X18X25CM	1
	Light navigation	1
	Boat anchor(15kg)	1
	Anchor Rope (10mm *200yds)	1

	Mooring	1
	Mooring rope (20mm *200yds)	1
